Release Notes

Installation Information

Directions on how to install OZONE are found in the Configuration Guides for OZONE and the Store.

Upgrade Information

Instructions for upgrading from older versions of OWF are found in the OWF and Store Configuration Guides' Appendices. While database upgrade and create scripts exist for four database types, the OZONE quality assurance team **only** tests the MySQL database upgrade and create scripts.

Release Stories

The OZONE 7.4.0 release focused on modifying the search and discovery experience through Affiliated Stores. Find the complete and specific list of tasks and completed bugs at: <https://www.owfgoss.org/jira/browse/OP>. The following section highlights the changes to Affiliated Search.

Affiliated Search and Discovery Changes

- 1) Search and Discovery of listings from Affiliated Stores now share the same look and feel as the listings from the local store.

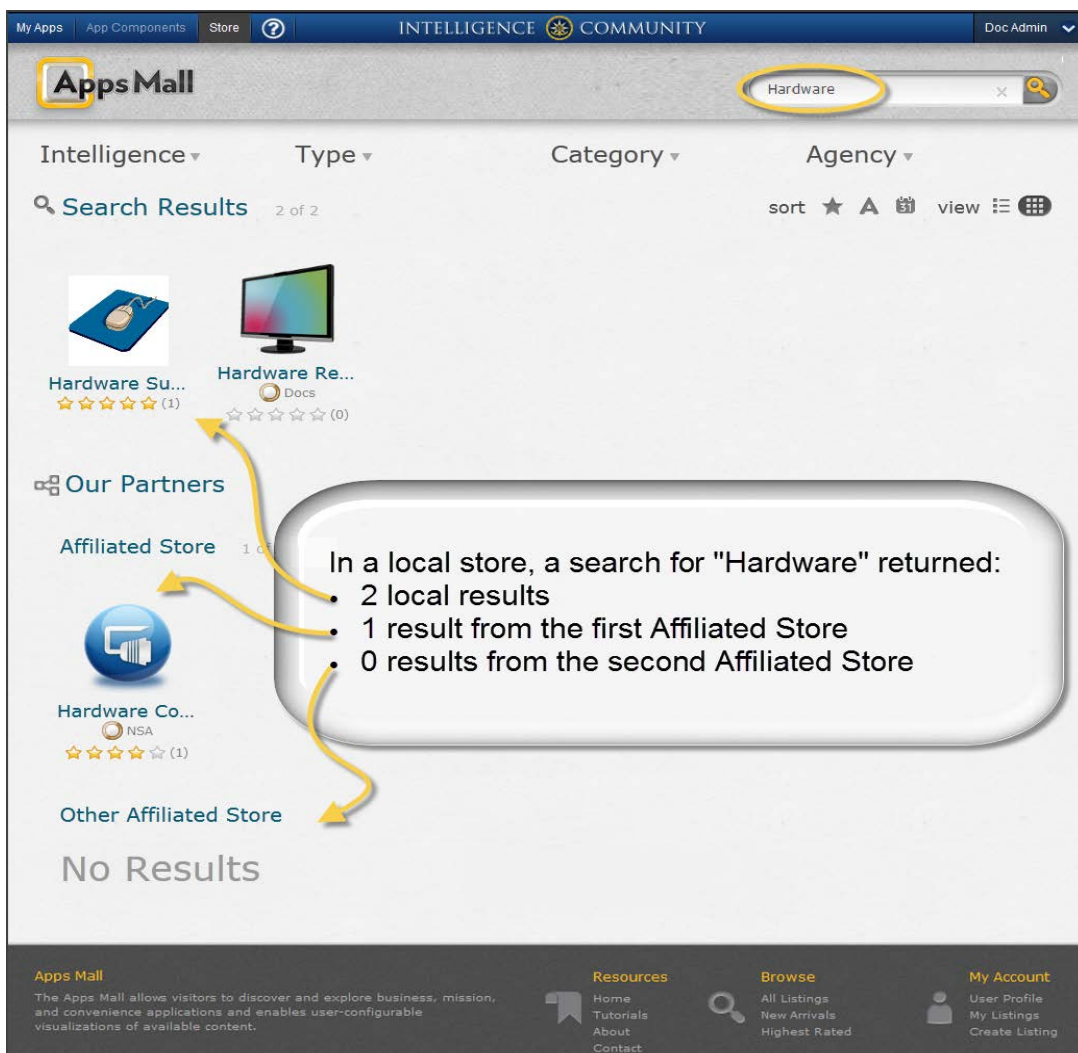

Figure 1: Search Results

- 2) Users can add app components (previously called widgets) from the Affiliated Store directly to OWF providing that sync is enabled. To add other listing types from an Affiliated Store, an OWF Administrator must add the Affiliated Store to the local OWF instance as an app component.

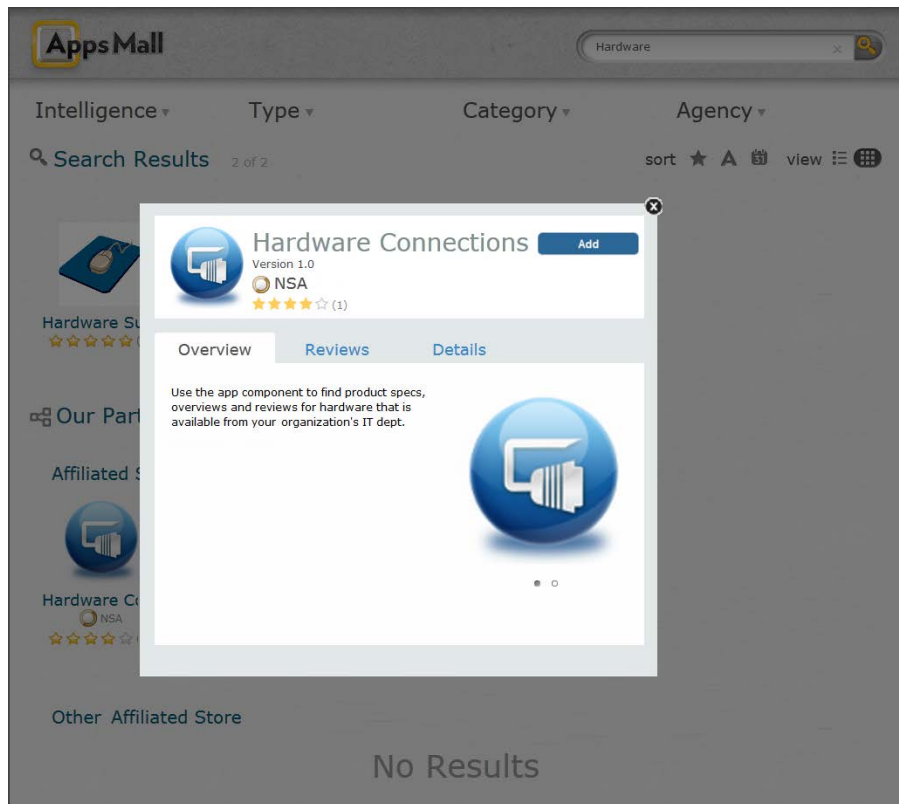

Figure 2: Listings from Affiliated Stores share the look and feel of the local store

Additional Details:

- The first six search results from each Affiliated Store will display on the search results page. If an Affiliated Store returns more than six results, click the left/right browsing arrows or pagination dots below the listings to navigate to additional results.

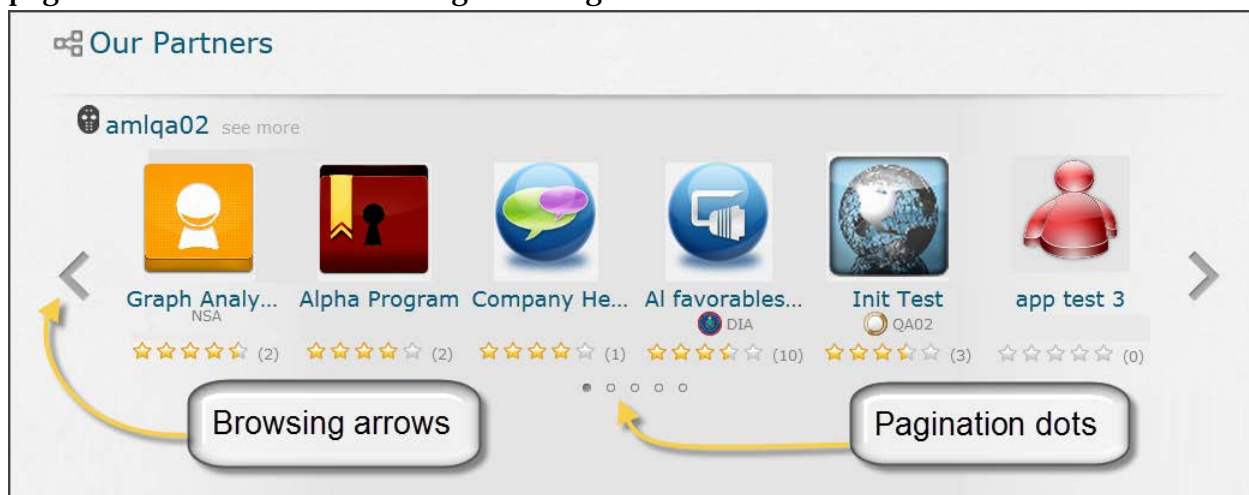

Figure 3: Pagination dots

- While users cannot add feedback to the Affiliated Store listings' review tab, they can read feedback if it already exists.
- If a user filters by Intelligence, Type, Category or Agency, the Affiliated Search results will not display. The OZONE Team plans to add this functionality in a future release.

- If more than 30 listings in the Affiliated Store match the search criteria, click the "see more" link adjacent to the Affiliated Store's name. This will open a full-page view of the results:

Figure 4: Local Store

The Affiliated Store will open and display **all** the search results.
