Release Notes

Installation Information

Directions on how to install OZONE are found in the Configuration Guides for OZONE and the Store.

Upgrade Information

Instructions for upgrading from older versions of OWF are found in the OWF and Store Configuration Guides' Appendices. While database upgrade and create scripts exist for four database types, the OZONE quality assurance team **only** tests the MySQL database upgrade and create scripts.

Release Stories

The OZONE 7.4.0 release focused on one store: modifying the Affiliated Store experience. This was the first release by the smaller OZONE development team. Find the complete and specific list of tasks and completed bugs see https://www.owfgoss.org/jira/browse/OP. The following section highlights the changes to Affiliated Search.

Affiliated Store Changes

Listings from Affiliated Stores now share the same look and feel as the listings from the local store. Also, users can add listings from the Affiliated Store directly to OWF pending that an OWF Administrator has added the Affiliated Store as an app component in OWF.

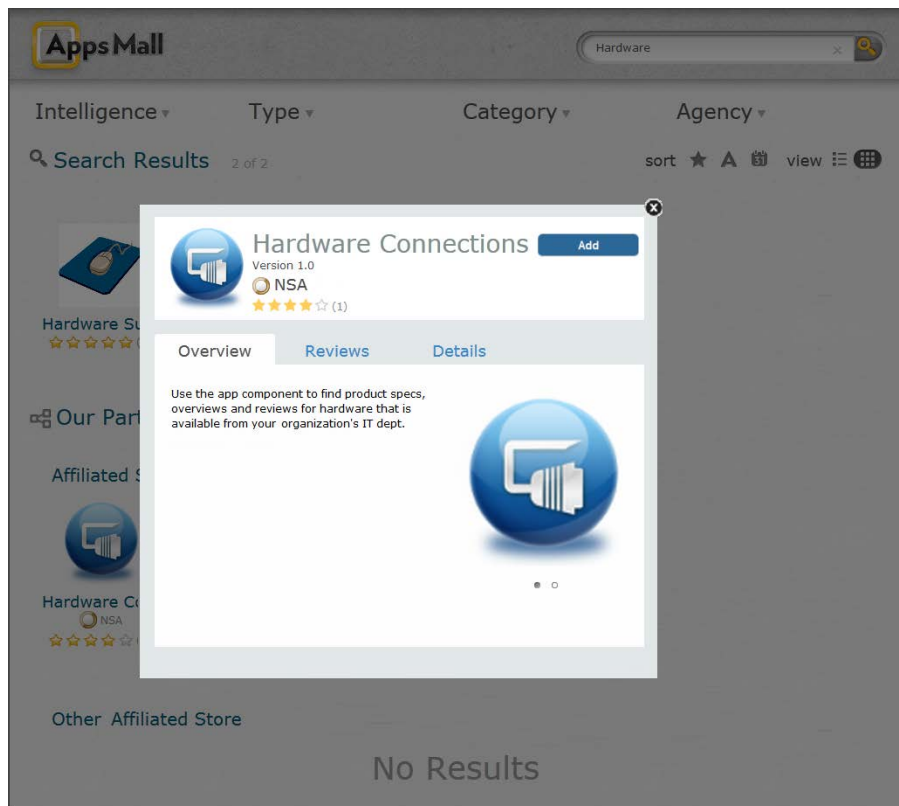

Figure 1: Listings from Affiliated Stores share the look and feel of the local store

Things to consider:

- By default, the first six search results from each Affiliated Store will display on the search results page. If an Affiliated Store returns more than six results, click the pagination dots below the listings to navigate to additional results. If more than 30 listings in the Affiliated Store match the search criteria, click the "see more" link adjacent to the Affiliated Store's name. This will open a full-page view of the results.
- While users cannot add feedback to the Affiliated Store listings' review tab, they can read feedback that already exists.

- If a user filters by Intelligence, Type, Category or Agency, the Affiliated Search results will not display.
