OZONE Widget Framework and Store

Release Notes

June 11, 2013

Publication/Revision History

Release	Date
OWF and Store 7.2	June 11, 2013

Contents

1   Release Notes

1.1   Installation Information

Directions on how to install OWF may be found in the Quick Start Guide and in the Configuration Guide.

1.2   Upgrade Information

Instructions for upgrading from older versions of OWF are found in the Configuration Guide Appendices.

1.3   Compatibility with Marketplace

OWF has been tested against Marketplace versions 2.4, 2.5, and 5.

1.4   User Stories: Stack Enhancements

- **OP-99** — As an end user, I would like to be able to launch a webapp from the store.
- **OP-94** — As an end user, I would like to be able to add a stack from the store into OWF.
- **OP-694** — As an end user, I would like a stack added from the store into OWF to be automatically available to me.
- **OP-93** — As an administrator, I would like to be able to import a stack into the store.
- **OP-208** — As an administrator, I would like stacks and dashboards to immediately appear in the switcher when associated with me.

1.5   User Stories: Store Enhancements

- **OP-26** — As an end user, when I add a widget from the store, I would like an animation indicating that it goes to my favorites.
- **OP-33** — As an end user, I would like the "Getting Started..." link in the store to take me to a tutorial.
- **OP-25** — As an end user, I would like an easier way to add a widget to OWF from the store.
- **OP-82** — As an end user, I would like the filters in the store to appear when hovering over them.

- **OP-23** — As an end user, I would like the store dashboard to be locked so I can't inadvertently remove the store widget.
- **OP-19** — As an end user, I expect the actions in a listing's hover to match the actions on the detailed listing.
- **OP-83** — As an end user, I would like a more intuitive way to get back to the store once I have navigated away from it.
- **OP-101** — As a developer, I would like to be able to add a universal name for my widgets in the store.

1.6 User Stories: Dashboard Builder Enhancements

- **OP-24** — As an end user, I would like an easier way to create a new dashboard.
- **OP-63** — As an end user, I would like to be able to click to place pane dividers and layouts in the app builder.

1.7 User Stories: Launch Menu (Favorites Menu) Enhancements

- **OP-60** — As an end user, I would like a more streamlined launch menu.
- **OP-18** — As an end user, I would rather see a "Description" column rather than the "Tags" column in the list view of the launch menu.
- **OP-84**— As an end user, I would like launching a widget or webapp to be consistent in the store and OWF.

1.8 User Stories: Security Enhancements

- **OP-219** — As an administrator, I would like audit events to be logged.
- **OP-266** — As an administrator, I would like to be able to use SSL for RDBMS connections.

1.9 User Stories: Miscellaneous Enhancements

- **OP-80** — As an end user, I would like auto closing modals to have an X in the upper right corner just like regular modals.
- **OP-20** — As an end user, I would like an indicator that the system is busy performing an action.

1.10   Fixes

- **OP-2** — The footer disappears and reappears as the detailed listing page is resized horizontally.

- **OP-3** — In Chrome, when adding a listing that requires other listings, the confirmation page does not go away once you click OK.

- **OP-4** — The installation URL and Doc URL are missing from specification tab.

- **OP-5** — The scorecard tab seems to cut off questions as they get expanded.

- **OP-6** — There is an "Unexpected Error" when performing a blank search with an affiliated marketplace.

- **OP-7** — In Chrome, when selecting a filter, the filter alignment is off.

- **OP-9** — The AML store shows the wrong favicon for Open Search from a browser.

- **OP-10** — The store dashboard with multiple widgets shows a floating widget when locked.

- **OP-11** — In Firefox 3.6, spacing is off for links on the application configuration pages.

- **OP-12** — In IE7, the Launch and Remove buttons in the launch menu are styled incorrectly.

- **OP-13** — In IE7, the "Getting Started" page loads slowly.

- **OP-64** — OWF toolbar tooltips appear in unexpected places after hovering the mouse and moving it.

- **OP-90** — The universal name is not added to OWF when adding a widget from the store.

- **OP-204** — The Actions button is broken for all types other than Widget.

- **OP-205** — Cannot launch a widget from the store.

- **OP-262** — In Chrome, the example Google Maps widget will not load.

- **OP-566** — When importing a stack, if the Stack URL is larger than 200 characters, it throws an error to standard out.

- **OP-573** — After importing a stack, editing it shows a "404" error and I cannot create listings.

- **OP-574** — Scorecard questions do not scroll if there are too many to fit on a page.

- **OP-581** — Removing a widget from a user in OWF while the widget is open causes OWF to freeze.

1.11 Known Issues

- **None**

Appendix A   Contact Information

A.1   Discussion Group

The OZONE Developers Discussion Group is hosted through Google Groups and can be contacted at ozone-developers@googlegroups.com. This forum is used for release announcements, Q&A related to OWF and for additional inquiries about features being developed across the user base. Access to the group can be gained by requesting an invitation at http://groups.google.com/group/ozone-developers or by contacting a member of the OZONE Widget Framework Team.

A.2   Additional POCs

For additional information or questions about OWF, please direct requests to the Discussion Group or to goss-support@owfgoss.org.
